

Mika Be

APPLIED AI | SOFTWARE ENGINEERING

Piscataway, NJ | (201) 913-4835 | mika.be@rutgers.edu | mikabe1805.github.io | github.com/mikabe1805 | linkedin.com/in/mika-be

EDUCATION

Rutgers University, New Brunswick | B.S. Electrical and Computer Engineering, CS minor Expected May 2028

GPA 3.838/4.000 | Dean's List, all four completed semesters

Honors 2nd Place Best Full Paper, IEEE ISEC 2026 | IEEE-HKN honor society | Bergen County Academies CS Award (1 of 3)

Coursework Data Structures; Digital Logic Design + Lab; Principles of EE I & II + Labs; Discrete Structures; Differential Equations

In progress Computer Architecture & Assembly + Lab; Linear Systems & Signals; Electronic Devices + Lab

RESEARCH

Kuiper TTS, Rutgers ECE | Undergraduate Researcher and Team Lead (PI: Prof. Dov Kruger) Sep 2025-Present

Python | *PyTorch Lightning* | *Piper/VITS* | *ONNX*

- Led and helped recruit an 18-member team building offline speech for blind and low-vision readers; assigned codebase tasks
- Designed spoken-math narration rules from A/B renders of 46 real equations (“ $d q \text{ over } d t$ ” became “the derivative of q with respect to t ”); adopted for spoken equations in a co-authored paper that won 2nd Place Best Full Paper, IEEE ISEC 2026
- Recorded 886 voice clips and trained custom voices on a one-command GPU pipeline; traced pitch jumps to augmentation
- Wrote audio-cleanup, augmentation and phoneme-coverage tools the team ported to C++, and the guide it uses to train voices

EXPERIENCE

this.is | Lead Software Developer (Internship) Jul 2025-Aug 2026

React | *TypeScript* | *Firebase* | *Cloud Functions* | *Google Places API*

- Built the production web app (saved lists, search, maps, messaging) as primary engineer; mentored and managed 2 interns
- Built a place-suggestion engine on the Google Places API with novelty tracking, result diversity and chain filtering
- Designed and built v2, a private planner for groups of 2-6 that suggests up to 3 places with stated reasons (live preview)

Schieber Research | Software Engineering Intern Sep 2023-Jun 2024

- Designed and built the first three prototypes of this.is, a discovery app centered on trusted friends' opinions (React, Appwrite)

Starbucks | Barista (part-time, alongside full-time coursework) Jul 2023-Jun 2025

PROJECTS

Room of Days | Creator and Solo Developer, life-RPG habit app Jun 2026-Present

Flutter | *Dart* | *Swift (WidgetKit)* | *Firebase* | *TypeScript Cloud Functions* | *Codemagic CI*

- Launched on the App Store (Aug 2026) as sole developer, from design through App Review; 10+ active users, 5.0 stars (5 ratings)
- Built the XP engine: 6 life stats, anti-grind repeat decay, opt-in difficulty ladders and streak freezes, with no loss for missed days
- Deployed Firebase room sharing and an opt-in public directory, with moderation Cloud Functions and App Attest device checks

Room Notes | Creator and Solo Developer, cross-device notebook (private beta) Aug 2026-Present

Flutter | *Dart* | *Objective-C++* | *Drift/SQLite* | *Firestore* | *Cloud Functions*

- Built a notebook where iPad (Apple Pencil), phone (board capture) and laptop (equations, code) edit the same fixed-layout pages, synced through a transactional SQLite outbox; in personal use for lecture notes
- Initiated a lecturer mode on 26 Cloud Functions: QR-joined private copies, anonymous answers; deployed as a professor pilot
- Patched Flutter's iOS engine to deliver coalesced (between-frame) Apple Pencil samples; built it in CI and shipped it to TestFlight

Knowsy Breadboard Lab, Rutgers ECE | Team Lead (1 of 7 module leads), 3-person team May 2026-Present

JavaScript | *SVG* | *Verilog*

- Created a browser breadboard, wired like a real one, for Digital Logic and EE II students to prepare for lab and debug circuits
- Built live breadboard-to-schematic rendering and bench-style debugging tools: logic probe, voltmeter and wiring warnings
- Turned course materials into 8 guided labs with 90 self-checking steps; wrote a nodal-analysis circuit solver and Verilog export

Bio (Discord bot) | Creator and Developer Sep 2025-Present

Node.js | *SQLite* | *Railway*

- Created and deployed a Discord bot that helps people in any server connect through shared interests; live in 2 servers

TECHNICAL SKILLS

Languages Python, Dart, TypeScript, JavaScript, C/C++, Java, SQL, Verilog, Swift

AI/ML PyTorch Lightning, ONNX, Piper/VITS voice training, speech data preparation (VAD, loudness normalization)

Software Flutter, React, Node.js, Firebase (Firestore, Cloud Functions, App Check), Drift/SQLite, Git, CI/CD (Codemagic)

Hardware and EE tools Digital logic (Vivado), LTspice, MATLAB/Simulink, breadboarding, oscilloscopes, logic probes, soldering, Onshape CAD, 3D printing
